

RE: Statement opposing the 10 year strategic plan from PMG Louis DeJoy

I do not support the slowing down of priority mail service, nor do I support the closure of post offices that are a vital part of local communities across our country. I do not trust the motivations of the PMG DeJoy, who has a vested interest in the privatization of the US Postal "service." This corrupt scheme to slow down our US mail service is unconstitutional, the US postal service has its own place in the constitution and so it is incumbent on all Americans that we protect, fund and restore the vitality of this critical service. PMG looks out for no one but his own profits and the corporations for whom he works. He does not work for us. His singular goal has everything to do with making higher profits for the logistics corporations that he works for, and disguises his attempts to undermine the postal service as "cost-saving" measures. Meanwhile, he also undermines the peoples' trust and faith in their US postal service, and creates a niche for the very logistics companies that he indeed works for. Save the USPS. Fund it, bring it up to speed in the 21st century with new all-electric delivery trucks, keep priority mail fast at 2 day delivery service and above all else don't close peoples' post offices. I will be contacting my congressman Frank Pallone of NJ-6, Cory Booker and Bob Menendez to express these views as well.
